

NETWORK ENGINEERING

Nexius fully supports clients with the expertise they need to both plan and optimize networks to perform both optimally and harmoniously from end-to-end, regardless of technology. Understanding the impact on capital investment, operational expense and overall performance, we strive to ensure that our recommendations are flexible and robust – meeting both immediate needs and future contingencies.

SERVICE OFFERINGS

RF Engineering

- ➔ Network Planning and Design
- ➔ Network Performance and Optimization
- ➔ Field Services, Compliance and
- ➔ Competitive Analysis

Wireline Engineering

- ➔ OSP Planning and Design
- ➔ In-Building Planning and Design

TECHNICAL EXPERTISE

- ➔ LTE
- ➔ LTE-A
- ➔ CDMA/EVDO
- ➔ UMTS/GSM
- ➔ Carrier Adds
- ➔ Microwave
- ➔ Fiber
- ➔ Small Cell
- ➔ DAS
- ➔ Wi-Fi
- ➔ Big Data
- ➔ NFV & SDN

UNIQUE APPROACH

Whether you want to migrate to a new technology platform, launch a major deployment effort, optimize your existing network or create a strategy for important growth areas, Nexius can assist you every step of the way.

EXPERTISE

Nexius stands apart as a specialist in the industry, focused solely on the communications industry we employ the leading experts in every aspect of this evolving technology.

STRATEGIC PARTNER

At Nexius, we adapt and advise as if your unique financial, strategic and customer concerns were our own – providing transparency, automation and intelligence throughout the process.

TRANSFORMATIONAL

We believe in a holistic approach, analyzing how next-generation technologies can best be used to enhance overall performance – in both the near and long term.

EFFICIENT

Nexius has invested heavily to turn our real-world experience into a state-of-the-art software automation platform for effectively defining and managing the complexities associated with communications networks.
