## PROGRAM MANAGEMENT

At Nexus, we have distilled decades of real-world experience into the most robust set of best practice processes, automation solutions and reporting tools for managing the complexities specifically associated with communications network projects. Through enhanced project execution, innovative applications, and collaborative teaming, we build consensus among stakeholders on program objectives, specifications, and time lines to relentlessly drive the program to completion.

### SERVICE OFFERINGS

- ➔ Program Feasibility Studies
- ➔ Performance Planning
- ➔ Program Budgeting and Resourcing
- ➔ Operational Training
- ➔ Recovery Planning
- ➔ Troubleshooting
- ➔ Project Management and PM Training

### TECHNICAL EXPERTISE

- ➔ LTE Overlays and Upgrades
- ➔ Small Cell Deployments
- ➔ Network Virtualization
- ➔ SDN & Management Solutions
- ➔ Backhaul Enhancements
- ➔ Microwave Optimization
- ➔ Antenna Optimization
- ➔ Decommissioning

### UNIQUE APPROACH

Whether you want to migrate to a new technology platform, launch a major deployment effort, optimize your existing network or create a strategy for important growth areas, Nexus can assist you every step of the way.

#### INTEGRATED

Our state-of-the-art software automation platform can interface directly with client systems to streamline reporting requirements and provide real-time data on delivery schedules.

#### COST EFFICIENT

Nexus automation tools provide visibility to control back office expenses associated with managing hundreds of contractors across the country.

#### NATIONAL REACH

With local teams positioned around the country, Nexus offers significant time-to-market advantages for new technology rollouts.

#### PREEMPTIVE

Leveraging years of knowledge gained through field experience, Nexus is able to stay in front of the issues that can disrupt projects, ensuring that programs stay on-time and on-budget.
